My question is this for heaven sake, if India changes it's rules and all policies such that, All scientists, and High skilled professionals, start going to India, instead of western Five Super Powers, what would happen to world economy?

"Before I write my name on the board, I'll need to know how you're planning to use that data."

What do you mean by scientists and professionals?

"Before I write my name on the board, I'll need to know how you're planning to use that data."

SCIENTIST: The one who is capable of becoming an Engineer & Doctor, both talents in one body.
PROFESSIONALS: All people/ individuals who are multi-talented or multi-skilled. Those High skilled immigrants are equal to more than two ordinary people. e.g., "engineer & economics" and so on.. etc., They can produce ROI, more than 100 folds of original investments from elites!

"Before I write my name on the board, I'll need to know how you're planning to use that data."
