- □Some say Galaxies are Time Capsules in Universe with Stars making them flourish and then whatever has flourished for billions or trillion of years. Then Black Holes Recycles what has flourished for Trillion of years or Yougs or Ages.
- □You know there are escape velocities based upon how strong the Gravity factors are and the size of the object or piece of matter! Can you even calculate or imagine the escape velocity for a giant piece of matter? Simply stated it will be said it is infinite m/sec! However, smaller the matter for example 'Gas molecules' or like, the escape velocity will not be INFINITY meters/sec. at the Black Holes.
