- The maximum value for $k = N+C+H+M$. Now let's plug-in best-case values for all variables, then this turns out to be, $k=1+0+1+5=7$. However, the worst-case scenario gives us, $k=5-1-1-5= -2$ (in this case consider it is **Gunda Raaj**)

TABLE 1: Various Socio-Economic & Political Systems or Innovative Elected System (IES)

List #	Progress Index (π)	Political System Democratic D	Political System Autocratic A	Economic System Democratic (E _d) Assign/computed numeric value	Economic System Autocratic (E _{aH}) Assign or computed numeric Value	Economic System Tyrant Autocratic (E _{aT}) Assign or computed numeric Value	Citizens Happy Index (Hi)	Comments/ Notes

$$H_i = k_i \cdot \pi / (E_d \text{ or } E_{aH} \text{ or } E_{aT}) \text{ ---- Eqn \#2}$$

Where K_i will be computed based upon the following criteria.

$$K_i = L_i + E_d + E_a + \text{Select correct applicable combination for } (E_d + D) \text{ or } (E_{aH} + D) \text{ or } (E_{aT} + A) + C_i$$

This information will be obtained from "worldwide reliable and reputable source"

- L_i values depend upon the following criteria;**
 For fair law and order index let's say there are 200 countries. If the listing of the country is <5, 1 being the super best. For ratings less than or equal to 5; the value will be **100**
 For listing between >5 to <10, the value will be **75**
 For listing between >10 to <50, the value will be **50**
 For listing between >50 to < 200 or whatever the maximum number is, the value will be **10**

In case, of two economic systems take the average number of the two $(E_{aH} + E_{aT})/2$

Table 2: ($E_d + D$), ($E_a + A$) & ($E_a + A$) Values computations

List #	$E_d + D$ Public Sector $E_d = \text{Corruption free Public Sector}$	$E_{aH} + D$ Public+ Private (Hybrid) $E_{aH} =$ Healthy/balanced type autocratic	$E_{aT} + A$ Total Dictatorship (Tyrannical) $E_{aT} =$ Tyrant type autocratic	Corruption Index $C_i = L_i$	Fair Labor Practices F_i
1	100	80	50	$C_i = L_i$	Wage disparities, any type of discriminations etc. Range 0.1 to 1.0 For wage disparities less than 1%. The value for F_i will be 1.0 For disparities $\leq 5\%$, F_i will be 0.5 and $\leq 10\%$, F_i will be 0.4; for disparity more than equal to 20%, F_i will be 0.1 (Slave wages)
2	100	80	50	$C_i = L_i$	
3	100	80	50	$C_i = L_i$	

c) NOTES:

- i) **Note this down the attitude of all workers in western world is like this** " Also, you don't need to attach any images, just give me a call and I can help you out anytime. My email meant that I could share images/docs if you had issues, not the other way round. If you want, I can arrange sometime during daytime to call and discuss the exact status of your issues. You are our customer on priority and my phone is always for a call, since, we value your time." **In this case, the bad actors are used to enhance the influence of good companies, not other way around, I got it, why don't you? Yes, there is something called good money and dirty money.**
- ii) Please read and see Figure 1: Words of Wisdom, through a pictorial.
- iii) Figure 9: The Purpose of Blackholes Explained and Figure 10 is about innovation Vs non-innovation. Do you think that COVID-19 vaccination shots in the arm or in their Arms or Butts? Perhaps or will definitely change their lousy habits of Looting continuously without any regulations on their bad thinking?

- vi) Observations, I saw a loving and caring couple. They both were little dark-skinned. Their two children a Boy about 5-year-old and a daughter almost two years according to answer I received, when I asked them (parents). The husband had slogan on his T-shirt, "Rules hate him". I suggested he should have another T-shirt with this message that Bad Laws hate him or He does not like bad laws! His wife had T-shirt with this message "BE KIND". I had no recommendation for it. Coming back to their children, the lady was teaching her almost two-year young daughter how to use smart phone. I noticed that little girl was learning how to swipe across screen and how to just by touch of fingers she could change pages etc. It was amazing after about may be two hours, little girl became tired. I saw, how her mother is teaching her how to be positive and cheerful and caring. I saw as her mother is caring her daughter, the little girl was responding with caring gestures. It shows that the positive vibes are taught in fact very early on by caring parents. The mother, who knew, the importance of correct positive parenting especially by mothers from excellent backgrounds, know how and when to practice it!
- vii) The **Figure 11: Global Warming** depicts what is global warming, tip of the iceberg type depiction, it was present in 2014 to group of technocrats, I was named FR4, participants were chatting about global warming, everyone was presenting yearly or century level trends, I introduced scope of transformation of life on planets, when watched of over at least > Millions of Years. Then this led to another pictorial shown in **Figure 12: This is One of the Many Reasons, Why do I believe in Almighty**, you can see more details at this location [.GLOBAL WARMING](#) also see for more information about [GRAVITAION](#)
- viii) When this happens, that is with multitude of political parties, then this system definitely follows divide and rule policies. This divide and rule policy must be used very judiciously. If used carelessly can create a havoc/mayhem for all humanity! In other words, or more appropriately it can be stated in Hindi and Punjabi, it looks like it sounds much better and more impactful;

ਅਕਕਲ ਘਾਸ ਚਰਨੇ ਗਈ ਪ੍ਰਭਾਵ , ਬੁੱਧੀ ਭਰਿਮਟ ਹੇ ਗਈ ਪ੍ਰਭਾਵ
