Distance Travelled in ONE year at the Speed of Light = ONE YUG

TEN YUG = 1 MAHA YUG

1000 YUG = 1 Grand YUG

100,000 YUG = 1 LAKH YUG → Correct pronunciation is लॅख / लॅखां It is not pronounced as "LAC" or "LACS"

10 Lakh YUG = 1 Million YUG

10,000 Lakh YUG = 1 Billion YUG = ∞ for humans

Why our Sun looks perfectly Round?
Because it is more than 1000s Lakh Yug away
from "BLACK HOLE"

You can behave like manmukh or Gurmukh

What's Manmukh; these are those people who do
not believe in God.

What's Gurmukhi; these are those people who do
believe in God. They prefer to live an dlet live
and have genuine hearts!

Racism is worst than
COVID-19

When Sun is less than 1 Yug
away from Black Hole(s), it
looks like this
