It's called, Horse trading. The horse (like animals). When a Horse belongs to A-party and other B-Party wants A-party horse to join B-party, depending upon the wallop / clout of that horse, that means how many horses will follow a Super horse! Now a days for a super horse trade value is around ₹100 Crores (≈ US \$1.5 Million). Where does this money come from? It comes from tax payers money, for example, A few industrialists have favorite status with ruling party in the capitals, these favorite industrialists contribute to the political elections campaign funds! The winner or loser political leaders help industrialists get contracts!
